Blackberries

Blackberries grow on thorny, woody bushes called brambles or canes. The plants grow year round but the fruit is best in the spring and summer months. Blackberries have a variety of names including brambleberries, dewberries, and thimbleberries. Blackberries, like raspberries, are actually made up of a cluster of tiny fruits, called drupelets. Each berry has about 80 to 100 drupelets.

Growing Region: East Texas

Growing Months: April through June

Fun Fact

Blackberries, unlike raspberries, have a solid center when they are pulled off the "cane".
