

# Water Weekly

For the week of 01/25/21

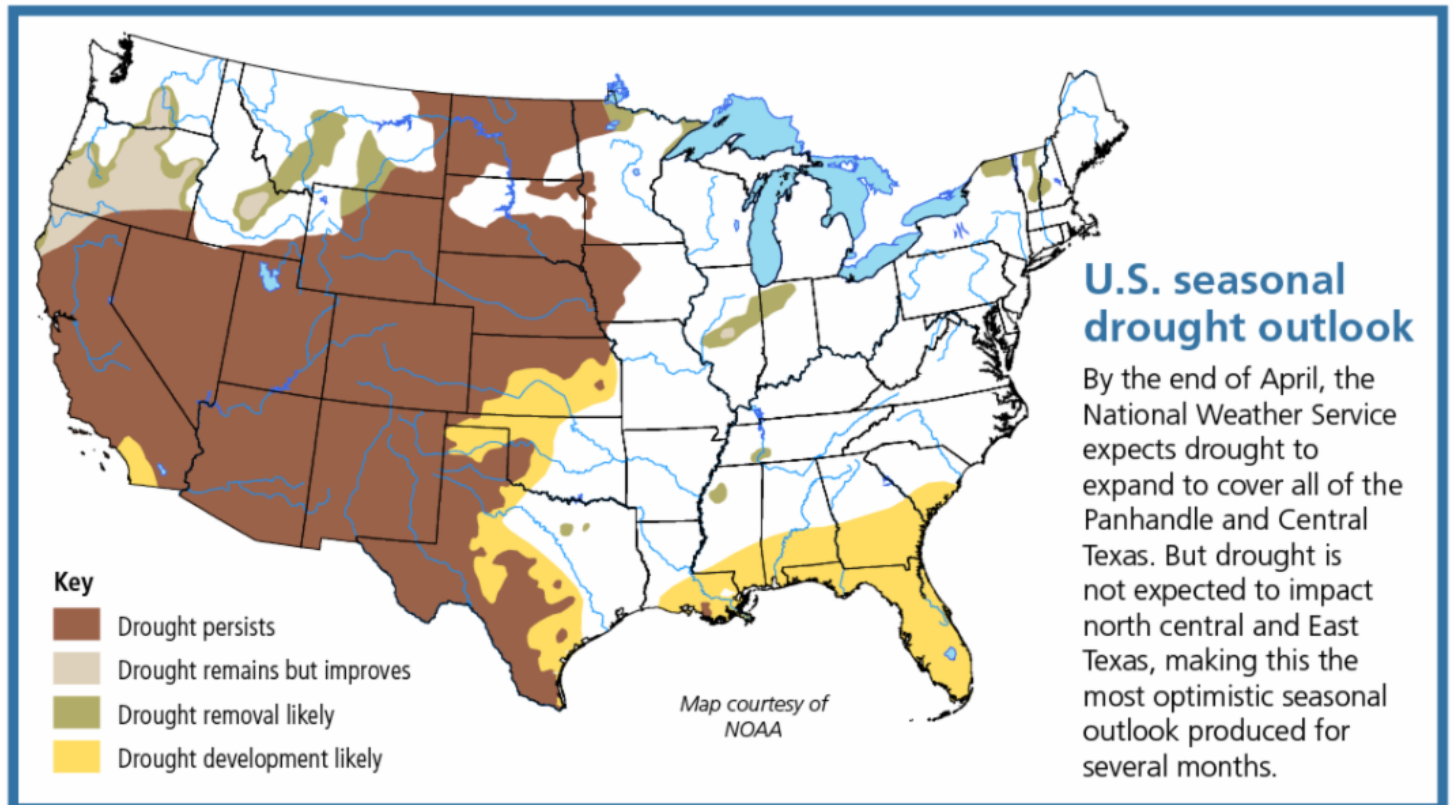

## Water conditions

After two weeks of significant improvement, the latest drought map for conditions as of January 19 shows little change from the previous week. Because of additional rainfall across the Panhandle and Central Texas since January 19, next week's drought map should further reduce the area of the state in drought.

## Drought conditions

- ◆ 49% now
- ◆ 48% a week ago
- ◆ 40% three months ago
- ◆ 35% a year ago
